

JAKE BROKAW

ABOUT ME

Hey there. I'm a web designer and front-end developer. My wife, our two cats, and I are currently in the process of moving to Portland, Oregon, which will be the fourth city in the past five years where we have lived. Besides designing and coding websites, I enjoy reading books about philosophy, hiking, and drinking a good cup of coffee or tea.

EDUCATION

UNIVERSITY OF TOLEDO
B.B.A. Information Systems
2008 - 2012

EXPERIENCE

● WEB DEVELOPER & DESIGNER

Formstack // Feb. 2015 - Present

I work remotely on the marketing design team. Some of my duties include: designing & building responsive web pages, optimizing our site's code, and designing marketing materials (i.e. ads, emails, graphics, etc.). Our small team recently created a brand design system and migrated our entire codebase over to said system.

○ DEVELOPER, IT APPLICATIONS

Nationwide Insurance // Feb. 2013 - Feb. 2015

I was the sole front-end developer on a team that handled one of Nationwide Insurance's financial applications. I also helped out other teams when they were updating their apps & sites to be fully responsive.

○ WEB SYSTEMS ASSOCIATE

Global Media Outreach // Jun. 2012 - Feb. 2013

I was one of six students to receive what started out as an internship out in San José, CA. I worked with the development team to create and update marketing sites and landing pages. As the internship ended, they offered me a remote position as their Web Systems Associate, where I had similar responsibilities.
